Summary: I'm dedicated to my work and willing to go the extra mile to make sure my work gives me satisfaction of getting it done. I grew up around a brother therefore I believe working around others is better for me, although I can still handle things on my own. I'm passionate about technology and my hobbies such as video games, pop culture, and movies. I adapt to new experiences and routines rather quickly and am willing to learn whatever it takes to better myself.

SKILLS

- Computational thinking skills - 4 years
- Experience with video editing and Adobe Photoshop design - 3 years
- Experience with Blender 3D modeling - 1 year
- Re-imaging of computers - Less than 1 year
- Social and interaction skills
- Collaborative seeking
- Computer Literacy - 10+ years
- Python - 3 years
- Unity - Less than 1 year
- C/C++ - Less than 1 year
- Computer Science-4 years

EXPERIENCE

Interned for the Information Technology Department of Metro

- I refurbished, replaced, and restored technological devices throughout the city and metro area. I did onsite visits with many high ranking officials, police divisions, and government buildings to replace, setup, or restore the device they needed. As well, I worked from our building to call customers that needed assistance and remote into their computers to fix the problem.

Reimaging and setting up computers

- At the Information Technology Department I reimaged computers for various places around Louisville and have gotten familiar with imaging on a large scale for companies and departments.

Home Craftsman Services, Louisville - *Home renovation with father*

On and off during the school year, more often in summer: 2015 - 2019

- Renovating homes and construction

Experience in diverse software

- Self taught for over 3 years in video editing and Adobe Photoshop design for my use to create and produce content.
- Experience with Blender 3D modeling and Unity game design.

Computer experience

- I have been a computer hobbyist for 8 years and am knowledgeable of a vast array of programs and technology aspects.

Programming

- I have vast knowledge of the language Python after 3 years of practice and have worked with C#

EDUCATION

- Fern Creek High School, Louisville KY - *Senior*

CERTIFICATIONS

- Computer Technology certification
